

# 2024 Federal Poverty Guidelines

- All programs that have eligibility guidelines based on poverty levels must adopt and use these new guidelines immediately.
- It is important to remember your program's income determination requirements as well.  
For CSBG purposes, you are allowed to calculate yearly income in three ways:
  - Actual yearly income
  - Multiply the past three months income x 4
  - Multiply the past six months income x 2
- Before using this method, check with your program supervisor or director for guidance! Not all funding source allow this type of calculating.

## • To Calculate Poverty Limits

To calculate a percent of poverty such as 115% of Poverty, simply multiply the poverty level (100% of FPG) by 1.15

Example: 115% of poverty for a family of four would be:

$$\$31,200 \times 1.15 = \$35,880.00$$

## • To Calculate a family's income as a percentage of poverty

If you are calculating incomes for CSBG purposes, you can determine the income as a percentage of poverty by dividing the person's income by the poverty level.

Example: A family of two earns \$12,500/year.

$$12,500 \div \$17,420 = .718 \text{ or } 72\%$$

Their income is 72% of the FPG.
